

# PowerTerm<sup>®</sup> Lite & PowerTerm<sup>®</sup> Plus

## The Host Access Solution for UNIX Connectivity

Ericom Software's PowerTerm<sup>®</sup> Lite and PowerTerm<sup>®</sup> Plus are designed exclusively for organizations requiring secure, reliable and high-speed connectivity to Unix and VT systems. PowerTerm Lite and PowerTerm Plus are optimized for Windows<sup>®</sup> platforms.

### Seamless Connectivity from PC to Host

PowerTerm Lite and PowerTerm Plus terminal emulators maximize enterprise-wide productivity by providing reliable access to accounting, inventory management, transaction processing and other mission-critical legacy applications.

### Terminal Emulation Exclusively for Unix

PowerTerm Lite and PowerTerm Plus provide emulation for most standard Unix terminal types, including VT 52/100/220/320, SCO-ANSI, BBS-ANSI, Wyse 50/60, AT368, Linux Console, Televideo TV1925/950 and IBM AIXterm, over network, modem or direct serial link from any PC.

### Five-Minute Installation

The full 32-bit terminal emulator has an extremely small footprint, allowing quick and simple installation onto any PC in five minutes.

### Powerful Features

PowerTerm Lite and PowerTerm Plus provide more features than any competing solution.

Features include customizable function keys and menu bar, graphical color selection, Power Script Language, multiple concurrent sessions, history scroll bar, Session Manager, intelligent copy and paste, scalable fonts and advanced printing.

These features ensure quick and reliable connections for sharing valuable information throughout the enterprise.

### ...Plus SSH Encryption and Secure FTP

For secure host connectivity, PowerTerm Plus provides SSH encryption. Additionally, PowerTerm Plus includes FTP Client, as well as SFTP for performing secure file transfers between PC and host.

## PowerTerm Lite/PowerTerm Plus Technical Specifications

<b>Platforms Supported</b>	Microsoft® Windows 7, 8, 10, and Windows 2008, 2008 R2, 2012, 2012 R2, 2016, 2019
<b>Hosts Supported</b>	Unix, Linux, OpenVMS
<b>Terminals Emulated</b>	VT52, VT100, VT220, VT320, VT420, VT525, SCO-ANSI, BBS-ANSI, AT386, AIXterm, Wyse 50/60, Televideo TVI 925/950
<b>Supported Interfaces</b>	Ethernet, Token Ring, Serial Ports
<b>Communication Modes</b>	TCP/IP Winsock, Pathworks DECnet, Pathworks LAT, Serial, Modem, Direct COM Port, PPP/Slip
<b>File Transfer</b>	FTP Client*, SFTP Client*, X Modem, Y Modem, Z Modem, transfer to/from clipboard, remote file browsing, ASCII
<b>Printing Support</b>	All printing sizes, landscape and portrait printing, print screen, auto print mode, advanced printing, host/release, from feed
<b>GUI Features</b>	Graphical drag & drop keyboard mapping, graphical color selection, customizable function keys, scalable fonts, status line, menu bar, toolbar, 80/132 column width, variable lines per page, double width/height characters, blink and underline attributes, reverse screen support, and more
<b>Language Support</b>	English, German, French, Spanish, Italian, Turkish, Greek, Danish, Finnish, Portuguese and more
<b>Security Features</b>	SSH, SSH keys, SFTP
<b>Other Features</b>	Modem dialing, multiple sessions, Power Script Language, script recorder, keep-alive-timeout, graphical drag & drop, keyboard property page, Intellimouse support, save-lock-state, language code pages support, automated login, hide menus, file operations, history scroll bar for session review, high-level API, DDE client & server, COM client, LK450 keyboard support, intelligent copy & paste of blocks/lines/words, floating programmable PowerPad keypad, status display for host and printer, and more
